GRIND YOUR WAY

IZAGA

HIGH CONSISTENCY AND PERFORMANCE
FOR THE MOST DEMANDING BARISTAS

IZAGA

INNOVATION AT THE SERVICE OF THE BARISTA.

The IZAGA coffee grinder features cutting-edge technology to ensure maximum precision, speed, and consistency in every coffee dose preparation.

In addition to the thermal separation between the motor and the grinding chamber, the IZAGA family features a heat extraction system that helps maintain a low temperature in the grinding chamber, preventing the quality of the coffee from deteriorating.

The balanced distribution of microfines in the portafilter ensures uniform extraction of the entire coffee puck, maximizing the coffee's potential.

It also has a bidirectional grind setting lock system, which helps maintain precise control over the grind adjustment, preventing errors due to improper handling.

To adapt to demand, IZAGA grinders allow for quick switching between PRE DOSE and ON DEMAND systems via an intuitive display and keypad.

TECHNOLOGY

Instant dose

Isolated grinding chamber

Bidirectional Locking system

Extremely durable burrs (optional)

Automatic Portafilter Identifier (optional)

Gestión on-line

FINISHES

Color: White, grey and black

Interface: Touchscreen

Alphanumeric display and membrane keypad

Accessories: With or without tamper

Automatic portafilter detection

Customization: Option to customize the hopper

TECHNICAL SPECIFICATIONS

Height	640 mm - 25,19 inches
Width	180 mm - 7,08 inches
Depth	352 mm - 13,85 inches
Connected load	220-240V 50Hz 220-240V 60 Hz 110-120V 60 Hzz
Power	525 W
Grinding burrs speed	1350 rpm
Net weight	16 kg
Burrs	Ø 64 mm. Planas
Hopper capacity	1,5 kg / 3,3 lb
Production per hour	8 kg/h
Grinder capacity	4 g/s
Single dose	5 - 18 gs
Double dose	5 - 28 g
